

CLIMATE ACTION

The president of the scientific and Technological Research Council of Turkey held a meeting with the rector of the University, dr. Chidem Turkyilmaz. At the rector's reception, dr. Hassan Mandal became closely acquainted with the University's activities, history and potential. After the rector's admission, professor Hasan Mandal, president of the scientific and Technological Research Council of Turkey, held a meeting with the Masters of the University and doctoral students conducting scientific work. The Grands, financial support and cooperation opportunities offered by the scientific and Technological Research Council of Turkey for the OSCE and researchers of Uzbekistan and Turkey are discussed in the meeting.— In the organization, special attention will be paid to current topics related to climate change, water resource management and building materials, - continued Dr. Hassan Mandal. - The best ideas and its authors always attract our attention, as well as other countries. We are always ready to support such ideas of SamSACU scientists! - urged scientists to be active in scientific grands. Also during the meeting, the president of the scientific and Technological Research Council of Turkey listened to the participants' opinions about the University's participation in local and international grands with its scientific potential, potential and specificity. The competitions, grands and opportunities offered by this organization have now received great interest by young scholars. At the end of the meeting, the rector of the University Chidem Turkyilmaz noted that the cooperation of Uzbekistan and the countries of Turkey, the role of the Organization of the scientific and Technological Research Council of Turkey (TÜBITAK), in particular, will expand the scientific capabilities of the University. The president of the organization, professor Hassan Mandal, gave his thanks for the visit and together with the team the photo was sealed in history. It is worth saying that in the current academic year, a number of scientific researchers of Samdaku are actively involved in such projects.

CLIMATE ACTION
